

## ABSTRACT

Ade Parmitha Chandra Devi. 2022. **CODE SWITCHING ANALYSIS AS FOUND IN BUNGA CITRA LESTARI YOUTUBE'S CHANNEL ENTITLED "LOVE STORY #1 – BCL SEBELUM & SESUDAH ASHRAF"**. English Study Program. Faculty of Foreign Language, Mahasaraswati Denpasar University. Supervisor: Ida Bagus Gde Nova Winarta, S.Pd., M.Hum ; Co Supervisor: Ni Made Verayanti Utami,S.S., M.Hum.

This research is aimed at identifying the types and functions of code switching. In order to analyze the data, the theory proposed by Poplack (1980) defines three types of code switching: tag switching, inter-sentential switching, and intra-sentential switching. Moreover, the theory from Appel and Muysken (1987) distinguishes the six functions of code switching are: referential function, directive function, expressive function, phatic function, poetic function, and metalinguistic function. The data source was taken from Bunga Citra Lestari YouTube's channel entitled "*Love Story #1 – BCL Sebelum dan Sesudah Ashraf*" which was published on February 12<sup>th</sup>, 2021. The method that was used to collect the data is qualitative method. This research found 79 data of code switching. In analyzing the data, the intra-sentential switching is commonly used by the participants in the video which found 50 (63,3%) data. Meanwhile, the metalinguistic function is dominantly used which found 32 (40,50%) data for the functions of code switching utterances by the participants. The result of this analysis is because both of the speakers, Daniel Mananta and Bunga Citra Lestari are bilingual persons and they often switch the language into other languages because their society also accepts the use of English terms.

Keywords: *Code Switching, Bunga Citra Lestari, YouTube's Channel.*
