Abstract

It is important for companies to know the company's financial performance and its effect on profitability, considering that profitability reflects the value of a company. The company's financial performance can be reflected in the company's finances. The better the company's financial performance will have a good impact on the company because the higher the profitability, which causes the stock price to tend to increase and vice versa. This study aims to re-examine the effect of the variables Cash Turnover, Accounts Receivable Turnover and Inventory Turnover on Profitability.

The population in this study is 193 manufacturing companies listed on the Indonesia Stock Exchange in 2017-2019. The sample in this study were 13 manufacturing companies which were determined based on the purposive sampling method. The analytical tool used to test the hypothesis is multiple linear regression analysis.

Based on the results of the feasibility test of the F test model, it shows that the variables of Cash Turnover, Accounts Receivable Turnover and Inventory Turnover on Profitability are declared suitable for use in this study. Based on the results of the analysis showed that the variables Cash Turnover and Accounts Receivable Turnover had a positive and insignificant effect on profitability. Meanwhile, Inventory Turnover has a positive and significant effect on profitability.
