Subject: Your Submission ENVI-D-19-00627R5

Dear Dr Vipriyanti,

Your resubmitted manuscript entitled "DEVELOPING MANGROVE ECO-TOURISM IN NUSA PENIDA SACRED ISLAND, BALI, INDONESIA" has been accepted for publication in Environment, Development and Sustainability.

You will be contacted by Author Services in due course with a link to complete the grant of rights. Please note that you will receive your proofs after the publishing agreement has been received through our system.

Following return of your proofs, your manuscript will be published online (after which no changes can be made) and placed in a print issue of the journal at a later date. We cannot give an exact print publication date, as we do not assign articles to issues in advance. If you have any questions about the publication of your paper, please contact the Production Office.

In addition, if you or any of your co-authors would be willing to serve as an occasional referee for manuscripts submitted to Environment, Development and Sustainability, please let us know and send us a list of key words that summarize your areas of expertise. Your help with manuscript review would be greatly appreciated.

Thank you for selecting Environment, Development and Sustainability for publication of your research.

With kind regards,

Luc Hens

Editor in Chief

Environment, Development and Sustainability

Please note that this journal is a Transformative Journal (TJ). Authors may publish their research with us through the traditional subscription access route or make their paper immediately open access through payment of an article-processing charge (APC). Authors will not be required to make a final decision about access to their article until it has been accepted.

Authors may need to take specific actions to achieve compliance with funder and institutional open access mandates. If your research is supported by a funder that requires immediate open access (e.g. according to Plan S principles) then you should select the gold OA route, and we will direct you to the compliant route where possible. For authors selecting the subscription publication route our standard licensing terms will need to be accepted, including our self-archiving policies. Those standard licensing terms will supersede any other terms that the author or any third party may assert apply to any version of the manuscript.

[Find out more about compliance](#)
