**COMMENTS TO THE AUTHOR:**

Reviewer #1: The author does not explain and elaborate more deeply on each finding (tables/figures) by confirming similar studies/library review. Thus, the author does not get a complete picture of the purpose of his research.

Authors need to adopt more reading material, add references, elaborate, in order to produce enrichment of theoretical concepts and implementation of their research

The author should develop a complete thought or idea to build a paragraph. Write more sentences and broaden the point of view to enrich the ideas in a paragraph. See published works in this journal

Reviewer #4:

You should do all comments one by one. I can't find your response (all answers must be highlighted on body manuscript). If you couldn't do any comments, We will reject your article.
