## Content:

The amount of wages determination is still low considering that the regulation has been long enough. In practice, the wages earned by Balinese dancers are very far from those specified in the rules. Payments received by dancers are lower compared to other singers or artists. In fact, Balinese dancers are one of the important components in the development of cultural tourism. This research will discuss about how is the protection of wages for Balinese dancers in the tourism industry and what efforts can be made to establish a Balinese dancer wages system involved in the tourism industry.

This research is designed with a qualitative approach that is critical research that targets not only to explore the meaning of the ethics but also create the meaning of the ethics. Qualitative data were collected in the form of Balinese dancer problems, government regulations and policies, Balinese dancer management techniques by dance studio, obstacles and constraints in protecting, social problems, economic condition of Balinese dancers, reward and punishment system to Balinese dancers involved in tourism industry, customary law in the protection of the citizens, the advantages and disadvantages of the Bali-based Customary Law-based dancers. The data were analyzed using qualitative data analysis technique with the pattern of deconstructive thinking of semiotics.

The protection of wages for Balinese dancers in the tourism industry is not yet optimal. The efforts can be made to establish a Balinese dancer wages system involved in the tourism industry namely in legal substance, structure, and culture.

## Keywords:

Balinese dancer, wage, tourism industry.
