

ABSTRAK

Suastama, I.B.N.A. Korelasi Antara Sikap dan Perilaku Terhadap Literasi Pemuda Mengenai DAS Tukad Pakerisan. Skripsi, Program Studi Pendidikan Biologi Fakultas Keguruan dan Ilmu Pendidikan, Universitas Mahasaraswati Denpasar. Pembimbing: (1) Ida Bagus Ari Arjaya, S.Pd, M.Pd. (2) Prof. Dr. Sang Putu Kaler Surata, M.S.

Kata Kunci: Sikap, Perilaku, Literasi Pemuda, DAS Tukad Pakerisan.

DAS Tukad Pakerisan dialiri dari berbagai sumber air seperti Tirta Empul, Mengning, Gunung Kawi dan masih banyak sumber air lainnya yang mengalir menuju Tukad Pakerisan. Pelestarian DAS Tukad Pakerisan sebagai warisan budaya dunia, sangat penting dijadikan gerakan bersama masyarakat, agar pengakuan UNESCO terhadap nilai adiluhung subak tetap terjaga (Wiasta, 2016). Tujuan dari penelitian ini yaitu menganalisis korelasi sikap dan perilaku terhadap literasi pemuda mengenai DAS Tukad Pakerisan. Jenis penelitian ini adalah penelitian kuantitatif yakni penelitian yang korelasional. Penelitian dilaksanakan pada bulan Januari sampai dengan bulan Mei 2021 di Desa Tampaksiring melibatkan 40 orang pemuda Desa Tampaksiring sebagai subjek penelitian. Instrumen penelitian ini berupa kuesioner yang disebarakan kepada partisipan. Teknik analisis data menggunakan statistik inferensial parametris yaitu korelasi *Pearson Product Moment*. Hasil penelitian menunjukan bahwa nilai korelasi pada kategori sikap terhadap literasi = r hitung 0,476 > r table 0.312, yang berarti terdapat korelasi sedang antara sikap dan literasi pemuda mengenai DAS Tukad Pakerisan dan nilai korelasi perilaku terhadap literasi = r hitung 0,431 > r table 0.312, yang berarti terdapat korelasi sedang antara perilaku dan literasi pemuda mengenai DAS Tukad Pakerisan.

ABSTRACT

Suastama, I.B.N.A. *Correlation Between Attitudes and Behaviors Towards Youth Literacy Regarding Tukad Pakerisan Watershed. Thesis, Biology Education Study Program, Faculty of Teacher Training and Education, Mahasaraswati Denpasar University. Supervisor: (1) Ida Bagus Ari Arjaya, S.Pd, M.Pd. (2) Prof. Dr. Sang Putu Kaler Surata, M.S*

Keywords: Attitude, Behavior, Youth Literacy, Tukad Pakerisan Watershed.

Tukad Pakerisan watershed is flowed from various water sources such as Tirta Empul, Mengning, Gunung Kawi and many other water sources that flow to Tukad Pakerisan. The preservation of Tukad Pakerisan watershed as a world cultural heritage, it is very important to be a joint movement of the community, so that UNESCO recognition of the value of adiluhung subak is maintained (Wiasta, 2016). The purpose of this study is to analyze the correlation of attitudes and behaviors to youth literacy regarding Tukad Pakerisan watershed. This type of research is quantitative research that is correlational research. The study was conducted in January to May 2021 in Tampaksiring Village involving 40 young people of Tampaksiring Village as the subject of the study. This research instrument is a questionnaire distributed to participants. Data analysis techniques use parametric inferential statistics i.e. Pearson Product Moment correlations. The results showed that the correlation value in the attitude category towards literacy = r calculated 0.476 > r table 0.312, which means there is a moderate correlation between attitudes and youth literacy regarding Tukad Pakerisan watershed and the value of behavioral correlation to literacy = r calculated 0.431 > r table 0.312, which means there is a moderate correlation between behavior and youth literacy about Tukad Pakerisan watershed.
