# Welcome Message!

## FROM ORGANIZING COMMITTEE

It is our great pleasure to welcome all participants to our international conferences, the 2nd International Conference on Industrial and System Engineering (IConISE), and the 7th Annual Conference on Industrial and System Engineering (ACISE) held on July 22-23, 2020.

This event provides a unique opportunity for authors to get together and share their latest research findings and results with the main theme of "Big Data Analytics: A Competitive Tools toward Smart Industrial System."

We are confident that over the two days, all participants will get the theoretical grounding, practical knowledge, and personal contacts that will help in building a long-term, profitable and sustainable communication among researchers and practitioners working in a wide variety of scientific areas.

On behalf of all the conference committees, we would like to thank those who have contributed to making our 2nd IConISE and the 7th ACISE another rousing success: our keynote speakers, presenters, session chairs, reviewers, and our participants.

We truly hope you will enjoy the conference and get what you expect from the conference.

# Introduction

## ABOUT IConISE 2020

Industrial engineering is concerned with the design, improvement, and installation of integrated systems of people, materials, information, equipment, and energy. Since its beginning, this scientific field has played significant roles in every industry; be it extraction and agriculture, manufacturing, services, knowledge, culture, and research. The International Conference on Industrial and System Engineering (IConISE) is held by Industrial and Systems Engineering Department of Institut Teknologi Sepuluh Nopember for associating and exchanging the better industrial engineering education, researches, and information among academicians and practitioners from different countries. Formerly known as the International Conference on Industrial Engineering and Service Science (IESS), the conference has been conducted since 2011. In the last decade, industries experienced a shift towards digitalization; thus, big data become one of the primary concerns in industrial engineering. Realizing the vital role of big data analytics, this year's conference designates it as the main topic.

## ABOUT ACISE 2020

Industrial development has now led to the employment of vast resources and technology in a swift time. It was also triggered by the need of the world for the target effectiveness, process efficiency, data accuracy, product diversity, strong core competencies, and other benefits. The desire to obtain fast information about this development encourages intense and productive collaboration between scientists, engineers, and industrial practitioners. The Industrial Engineering Department of UNDIP has instituted a platform for this need in the Annual Conference on Industrial and System Engineering (ACISE).

Starting from regional and national community events, ACISE has now advanced into an international-scale conferences. ACISE's last event was profoundly successful for gathering 180 papers and around 200 participants. In 2020, the 7th ACISE will be held together with the 2nd IConISE for further enhance the event scopes and impacts.

# GENERAL GUIDE

## OF THE JOINT CONFERENCE OF ICONISE & ACISE 2020

Due to the COVID-19 pandemic, IConISE & ACISE 2020 will be held in full streaming through ZOOM.

### 1. DRESS APPROPRIATELY

This is an international with huge number of participants come from many countries. Please take few minutes to throw on a formal attire. Put yourself in the right headspace to be productive.

### 2. BE AWARE OF YOUR SURROUNDINGS

The other participant will not be able to hear your ideas or take you seriously when there is a pile of dirty clothes in the corner behind you. Adjust your work setup so that you face a window or are exposed to plenty of light, and make sure your background is using professional and appropriate (the background will be given by the committee). This means:

- No beds (unmade or made) in the background.
- No messy rooms or open closets where everyone can see your clutter.
- No NSFW artwork.
- While kids and pets are adorable, and much needed distraction when you are feeling overwhelmed, other participants will not prefer to talk over a screaming child or barking dog. So, be mindful of noise.

### 3. LEAVE THE KEYBOARD ALONE

Since your laptop's internal microphone is inches away from the keyboard, the sound of your typing will be distracting. It is not only distracting everyone else in the meeting, it is also preventing you from devoting your full attention to the meeting.

### 4. CHECK YOUR CONNECTION

Please make sure your network adapter, Wi-Fi or internet connection to avoid **zoom** meeting problems during the plenary and parallel sessions.

### 5. SET YOUR ZOOM MEETING ID

The conference committee will admit only the registered participants into the meeting room. Please use "PAPER ID\_FIRST NAME" as your zoom meeting ID. Example: "100\_JOHNSON". If you have submitted more than 1 paper, please use: ID1\_ID2\_FIRST NAME. If you are a non-presenter participant, please set your zoom meeting ID as "FIRST NAME\_NON PRESENTER". Example: "JOHNSON\_NON PRESENTER".

### 6. MUTE THE MICROPHONE

The honorable speakers will deliver great speeches. Please mute your microphone when you are not speaking to give other participants the ability to chime in and share their thoughts without any distraction.

### 7. USE HEADSET / EARPHONES

Your computer's default audio output and input probably produce a background noise or create feedback in your video. You may use a headset, earphone or Bluetooth earpieces that connect to your computer during the sessions, as all participants will be able to hear clearly.

### 8. STAY SEATED AND STAY PRESENT

This conference will take around 8 hours of your day. It may be tempting to check your inbox or carry on a side conversation during the meeting, but please remain seated. You might miss out on key information or an opportunity to give input. If you are using your webcam, use attentive body language,

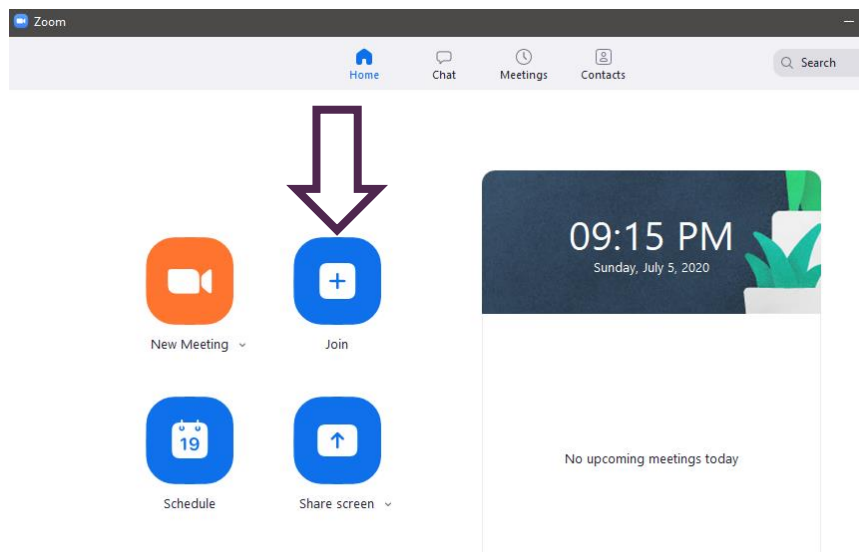

Sit up straight, do not make a big extraneous movement, and do not let your eyes wander too much.
